

Plants

I should already be able to: -

- > identify and name a variety of common wild and garden plants, including deciduous and evergreen trees .
- > identify and describe the main parts of flowering plants, including trees (roots, trunk, stem, branches, leaves, flower.

What Plants need to grow

Key Facts

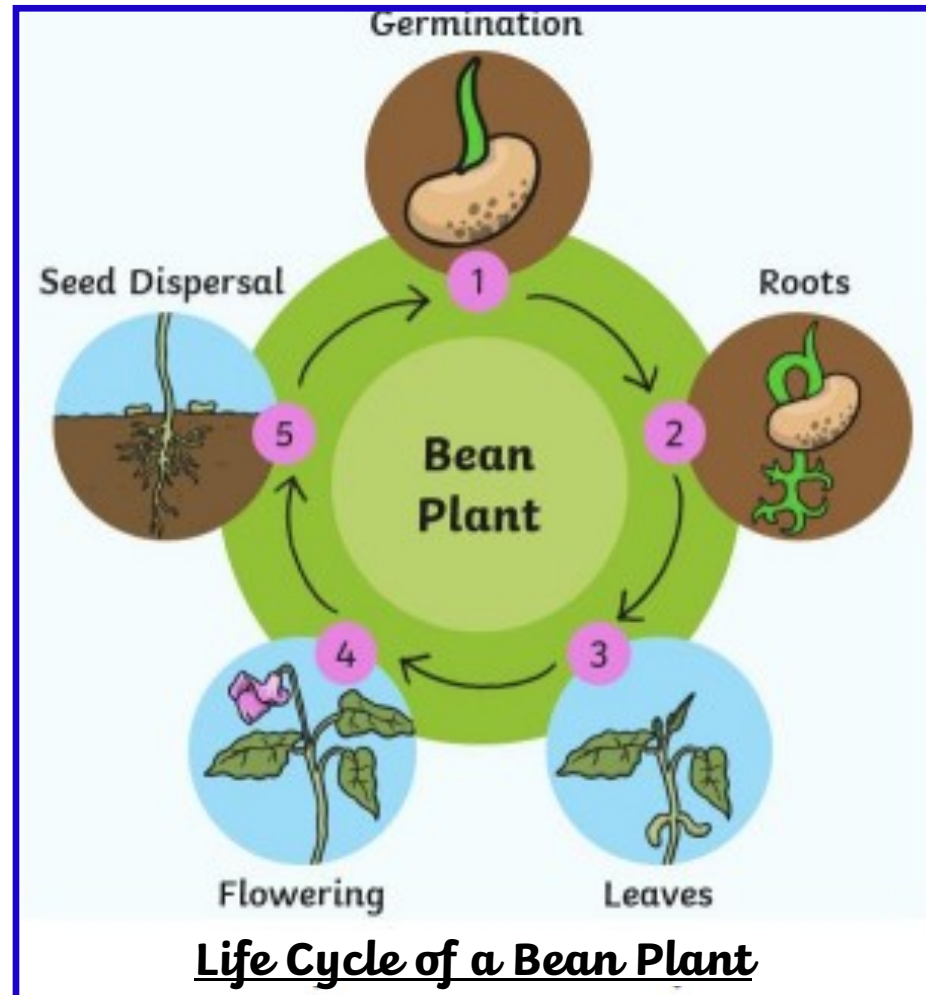

What do plants need to grow well?

Sunlight ; All plants need light from the sun to grow well. Some plants need lots of sunlight. Some plants only need a little sunlight.

Water ; All plants need water to grow. Without water, seeds and bulbs will not germinate.

Temperature; Temperature is how warm or cold something or somewhere is. Some plants like cooler temperatures and some like warmer temperatures.

Nutrition Food or nourishment; Plants make their own food in their leaves using sunlight

Key vocabulary:

germination - when a seed soaks up water, swells up and a tiny plant bursts out to begin growing.

seed coat— the outer layer of a seed that breaks open.

root— a root grows down from the seed into the soil looking for water and nutrients.

shoot— a shoot grows upwards from the seed or plant to find sunlight.

Parts of a plant:
